

Serious Innovation for **Searious** BBQ

Revolutionary **CRUCIBLE** Firebox Patent Pending

Huge Benefits!

- Brick is rated to **2,700° F!**
- Eliminates Structural Failure (Rampant in other brands)
- More Charcoal Capacity
- Huge Ash Capacity
- Easier and faster to start
- Optional Ash Pan and Stainless Charcoal Grate

Patented **Smokin' Chip Feeder**

Add smoke favor - safe and easy
(tool sold separately)

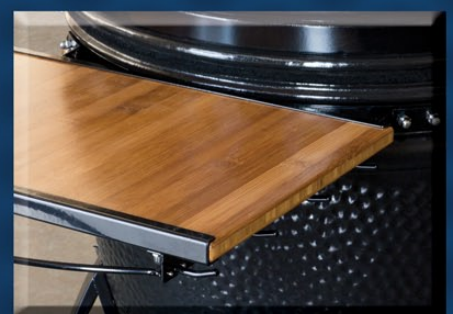

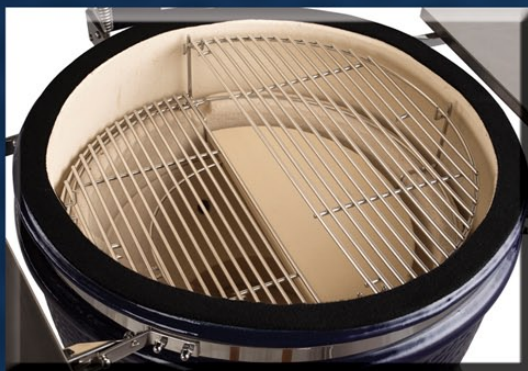

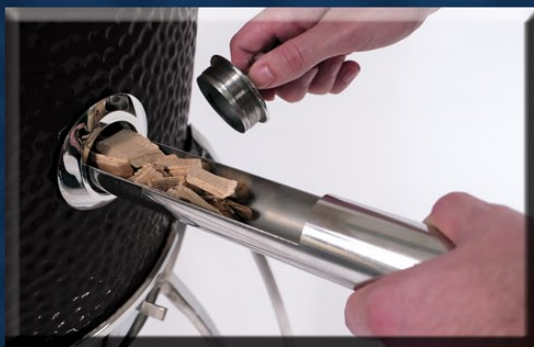

Lifetime Ceramic Warranty!

Cast Iron Top Control

Solid Bamboo Side Shelves

Multi-Level, Split-Grid Cooking System

Two Temperature Zones
High-Temp Grilling
and/or Roasting/Smoking

Revolutionary **CRUCIBLE** Firebox

Patent Pending

Firebox breakage is a common problem for most kamado brands. The Saffire Crucible eliminates the problem and also provides:

Huge Benefits!

Eliminates structural failure 4 ways:

- 12-piece brick design relieves thermal stress.
- Saffire brick is **2,700°F** rated! 1000° higher.
- Outer Shell made of Aluminized Steel (High thermal and corrosion resistance)
- Even if a brick should crack it has no effect! (The shell holds them tightly in place and also prevents any air leakage.)
- Individual bricks can be easily replaced.

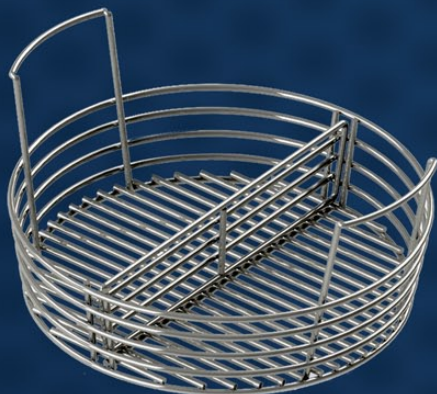

New Enlarged Shape = More Benefits:

- Large Charcoal Capacity for long cook times.
- Huge Ash Capacity for far less cleaning.
- Double the grate size of other kamado grills!
- Air space between brick and shell provides insulation for less charcoal use and longer burn.

Perhaps the single greatest improvement ever made for kamado and charcoal grill ease of use, cleaning and durability!

Options

304 Stainless Steel Charcoal Basket/Grate

- Easily remove the charcoal from your grill
- Removable divider - holds charcoal to one side.

Saffire's Double Size Grate Area Gives You;

- Faster starting a large bed of coals for grilling. Air now flows to entire bed of charcoal.
- Quick Shake to release ash into the pan. No more tedious raking of ash down through grate. (Typical bowl shape and small grate of others greatly restricts the flow of ash down to the bottom of the grill)

Huge Lift-Out Ash Pan

- Enormous size holds ash from several fires. (A small ash pan needs to be cleaned out virtually every time you cook)
- Insulating air gap under Pan provides even more efficiency and safer temperatures on bottom.
- Quick and easy to lift-out and dump the ash. No more digging ash out through the air control! YES!

Multi-level Cooking

Multi-level Cooking Flexibility

Place food at the lower level, for intense, radiant, searing heat or at the top level, further from flames for less intense temperatures and easy access to food. You may even cook on both levels at once!

Left/Right or Front/Back Heat Zones

Half-grids may be left/right or front/back. Additional grids may be added to cook on one and a half or two full levels. The Secondary Cooking Grid may also be placed on top of that for cooking on three levels!

The Ceramic Heat Deflector may be placed below the grids to provide indirect cooking for roasting and smoking. It comes in two pieces so just one half may be placed in the grill to allow direct radiant searing right along side of indirect cooking, roasting or a holding area.

Grill • Smoker • Pizza Oven

A Quantum Leap in barbecue flavor and performance

Saffire has combined the ancient ceramic cooker with modern technology and innovation. Our thick ceramic walls provide an efficiency that produces many advantages over a metal grill or smoker. And with the natural flavor and easy starting of hardwood lump charcoal you'll be cooking more delicious barbecue than you can imagine!

Grilling - up to 1,000 degrees for quick searing.

Smoking - Holds low temperatures for 16+ hours (one load of charcoal) for true slow-smoked barbecue.

Wood-fired Pizza Oven - The ceramic dome reflects the heat and cooks like a brick pizza oven.

Configuration

Black Powder Coat Hardware
Color = Black Ceramic Glaze
Bamboo Side Shelves
Cart & Shelves in Grill Box
Sizes = Medium, Large, X-Large
Ash Tool included

New Features

New Stainless Handle
New Crucible Firebox (Lg.)
New Multi-level Cooking Grid -
with adjustable half-grids (Lg & XL)

Why **SAFFIRE**?
GRILL AND SMOKER

Saffire has made it easier than ever before to cook championship BBQ at home!

We've made the charcoal barbecue grill and smoker easier to use, more efficient, much more durable, more safe and also attractive on the patio.

Here's how:

- The leading industry innovator for 12 Years.
- Heavy-Duty, beefed-up ceramics and hardware.
- Patented Smokin' Chip Feeder.
- Revolutionary Firebox with HUGE BENEFITS!
(Details on page 2 with "Crucible Firebox")
- More charcoal capacity = longer cooking
- Faster to start large bed of coals for grilling.
- Gigantic ash capacity for less cleaning.
- Multi-Level, Split-Grid Cooking System.
- More spacious interior cooking areas/levels.
- High quality ceramics - LIFETIME WARRANTY
- Highest quality made yet amazing low prices.
- *Optional* - Stainless Steel Charcoal Basket
- *Optional* - Ash Pan for easiest cleaning ever!

See the "Saffire Advantages" list for much more!

Optional Accessories
